

As Long As I'm With You

Verse 1:

I fell in love with your blue eyes
My heart skips a beat every time you smile
You're playing tricks with my mind

Just wanna close my eyes and
leave this for a minute and take your hand
I find a place where we can

I know that young love can brake and fall apart
I know that we can never shelter our hearts
let's keep on dancing in the night like stars

I know that we can only play a part
so for tonight let's say the world is ours
let's keep on dancing in the night like stars

Chorus:

As long as I'm with you

Verse 2:

And I have never felt it this way
my heads warm, I'm shaking but it's okay
As long as I'm with you

It's like the song on the radio
One kiss and you can't let her go
When it's you it's all right

I know that young love can brake and fall apart
I know that we can never shelter our hearts
let's keep on dancing in the night like stars

Chorus:

As long as I'm with you

Bridge:

We are lost here together
cause all we know, all we know
That nothing last forever
but we'll keep on going strong
and we keep on going strong
